iPhone Email Account Setup

Note: Synchronizing an email account to your iPhone copies your email account settings, but does not copy your email messages. Whether the messages in your Inbox display on both your iPhone and your computer depends on the type of email account you have and how it is configured.

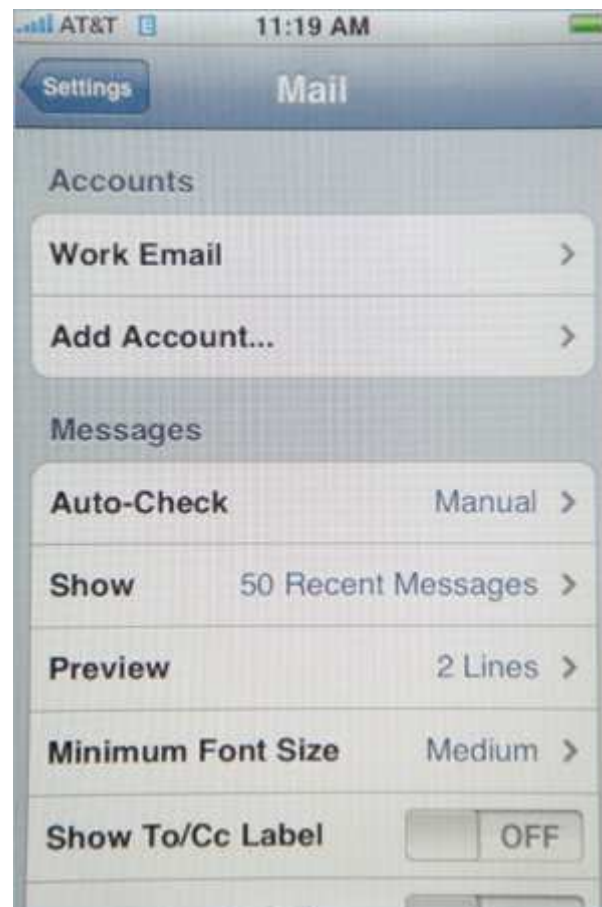

Setting Up an Email Account on your iPhone

If this is the first email account you're setting up on your iPhone, tap **Mail**. Otherwise, from the Home screen, tap **Settings**.

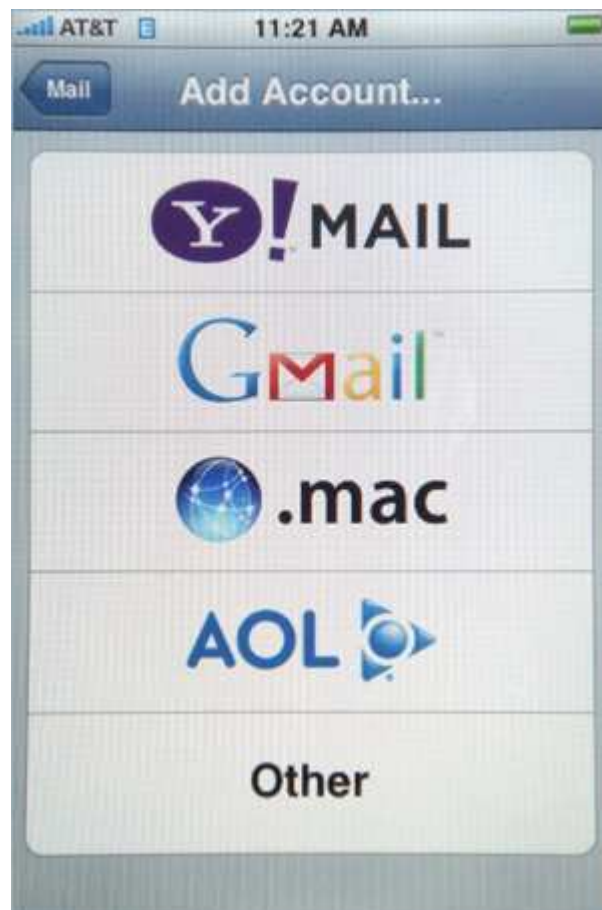

On the Settings screen, tap **Mail**.

On the Mail screen, under **Accounts**, tap **Add Account**.

On the **Add Account** screen, tap **Other**.

Select **POP** and then enter your account information using your keypad.

Name

Enter your name.

Address

Enter your email address.

Description

Enter a description of this email address. The description displays in your email account list on your iPhone.

Enter your **Incoming Mail Server** information.

Host Name

Enter **pop3.mric.net**

User Name

Enter your user name.

Password

Enter your password for your email account.

Enter your **Outgoing Mail Server (SMTP)** information.

Enter **outgoing.mric.net**

User Name

Enter your user name.

Password

Enter you password for your email account

Under **Outgoing Mail Server (SMTP)**, tap **Advanced**.

Set **Incoming Uses SSL** to **OFF**.

Set **Outgoing Uses SSL** to **ON**.
